

**LAB MANUAL  
FOR  
DBMS LAB**

## **1. SQL BASICS**

The structure queries language is a language that enable to create and operate on relational database ,which are sets of related information stored in tables .  
SQL has clearly established itself as the standard relational database language.

### **PROCESSING CAPABILITY OF SQL:**

The various capability of sql are:

1. DATA DEFINITION LANGUAGE(DDL):

The sql DDL provides commands for defining relations schemas ,deleting relations ,creating index and modifying relations schemas.

2. INTERACTIVE DATA MANIPULATION LANGUAGE(DML):

The sql DML includes the queries language based on both the relational algebra and the tuples relational calculas. It includes also command to insert ,delete and modifying in the database.

3. EMBEDDED DATA MANIPULATION LANGUAGE:

The embedded form of sql is designed for use within general purpose programming language such as pl/1,cobol ,fortran,pascal and c.

4. VIEW DEFINITION :

The sql DDL also includes commands for defining views

5. AUTHORIZATION :

The sql DDL includes command for specifying access rights to relation and views.

6. INTEGRITY:

The sql provides forms of integrity checking. Future products and standard of sql are likely to include enhanced features for integrity checking .

7. TRANSACTION CONTROL:

Sql includes command for specifying the beginning and ending of transaction along with commands to have a control over transaction processing.

THE BASIC STRUCTURE OF AN SQL EXPRESSIONS CONSISTS OF THREE CLAUSES:

- SELECT
- FROM
- WHERE

A typical sql query has the form

Select a,b,c,d.....

From a1,b1,c1.....

Where p;

### **1.SELECT CLAUSE:**

select branch-name from loan;

it will select all branch-name from the loan table

### **2.WHERE CLAUSE:**

select loan-number from loan  
where amount between 8000 and 9000

it will select all loan-number from loan where amount is between the 8000 and 9000

### **3.FROM CLAUSE:**

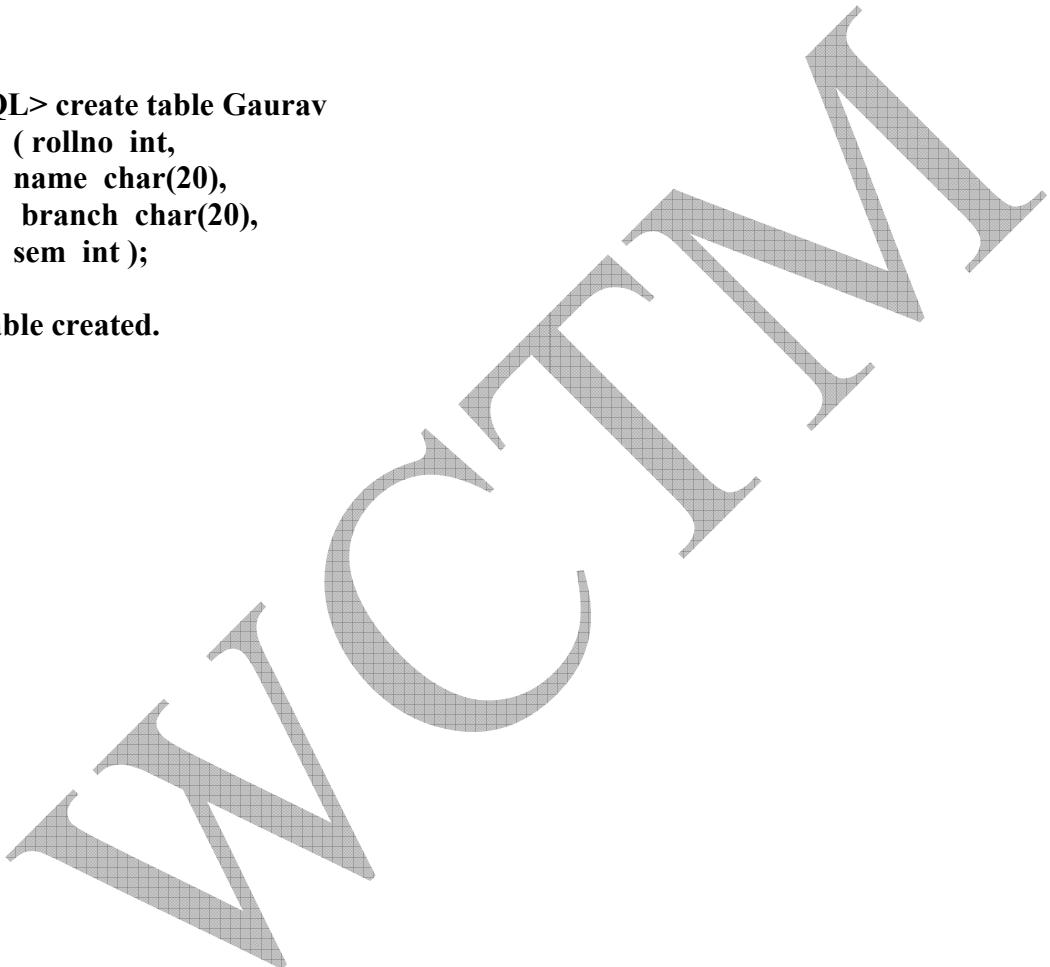

select customer-name,borrower.loan-number,amount  
from borrower,loan  
where borrower.loan-no=loan.loan-no

**2.**

**TO CREATE DATABASE**

```
SQL> create table Gaurav  
2 ( rollno int,  
3 name char(20),  
4 branch char(20),  
5 sem int );
```

Table created.

### 3.

## CREATION OF TABLE WITH CONSTRAINTS:

```
SQL> create table Gaurav  
2 ( empid int constraint v1 primary key ,  
3 epmnm char(20) constraint v2 unique,  
4 desig char(20) default 'clerk',  
5 dept char(20) constraint v3  
6 check(dept in('edp','fin')),  
7 salary int constraint v4 not null);
```

Table created.

Description of the above table:

```
SQL> desc Gaurav;  
Name          Null?    Type  
-----  
EMPID        NOT NULL NUMBER(38)  
EPMNM        CHAR(20)  
DESIG        CHAR(20)  
DEPT         CHAR(20)  
SALARY        NOT NULL NUMBER(38)
```

## 8. ALTER TABLE :

(a) Adding column : (ADD clause)

```
SQL> alter table Gaurav  
2 add (marks int);  
Table altered.
```

(b) Adding multiple columns clause) :

```
SQL> alter table Gaurav  
2 add (fav_sub char(20),stdid int);
```

Table altered.

(c) Changing column width :(MODIFY clause)

```
SQL> alter table Gaurav  
2 modify branch char(10);
```

Table altered.

(d) Dropping column :(DROP clause)

```
SQL> alter table Gaurav  
2 drop column stdid;
```

Table altered

(e) Adding NOT NULL : (MODIFY clause)

```
SQL> alter table Gaurav  
2 modify (rollno int not null);
```

Table altered.

(f) Dropping NOT NULL : (DROP clause)

```
SQL> alter table Gaurav  
2 modify (rollno int not null);
```

Table altered

(g) Adding check constraint : (ADD clause)

```
SQL> alter table Gaurav  
2 add constraint v11 check(branch in('it','csc'));  
Table altered.
```

(h) Dropping check constraint : (DROP clause)

```
SQL> alter table Gaurav  
2 drop constraint v11;
```

Table altered.

(i) Adding Primary key :

```
SQL> alter table Gaurav  
2 add constraint v11 primary key(name);  
Table altered
```

.

(j) Removing Primary Key :

```
SQL> alter table Gaurav  
2 drop constraint v11;
```

Table altered.

(k) Dropping a primary key that have a dependent table:

```
SQL> alter table Gaurav  
2 drop primary key cascade;
```

Table altered.

(l) Adding Foreign Key :

```
SQL> alter table Gaurav  
2 add constraint v11 foreign key(rollno)  
3 references employee;
```

Table altered.

(m)Dropping Foreign Key :

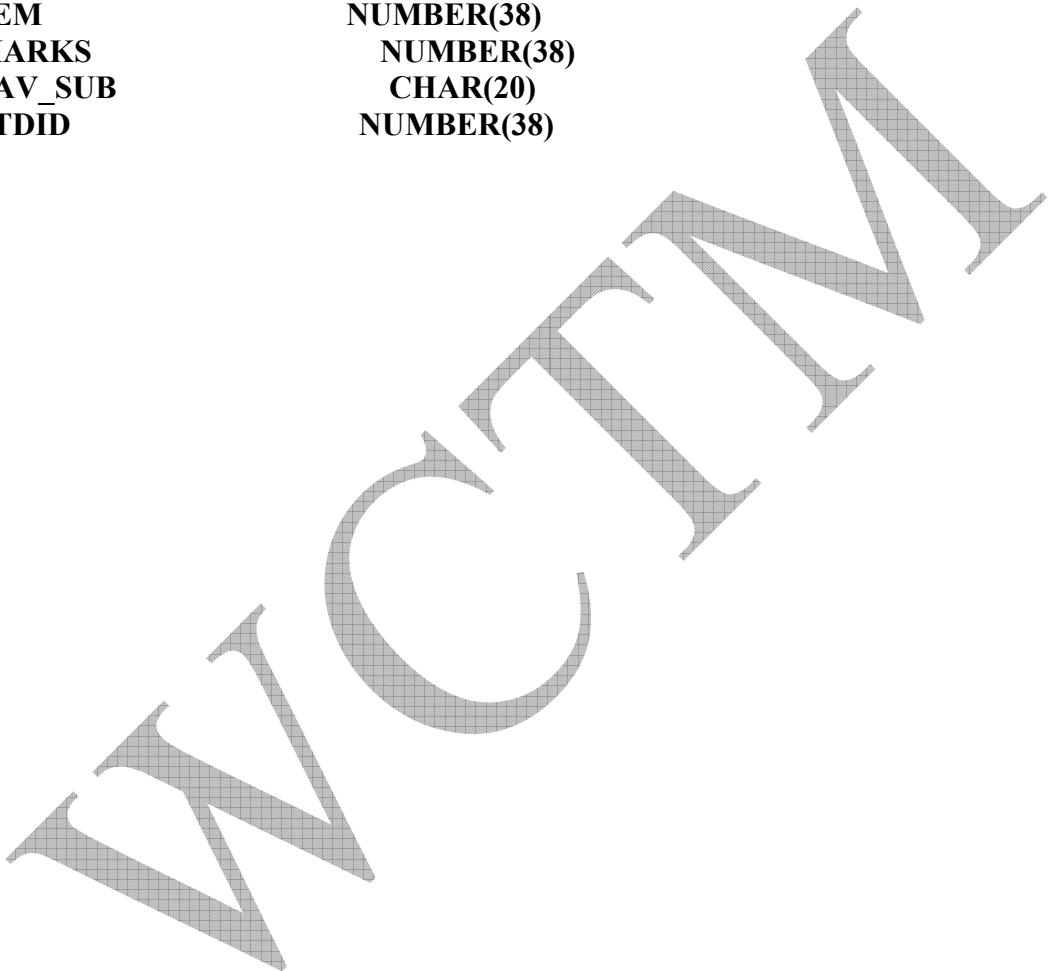

```
SQL> alter table Gaurav  
2 drop constraint v11;
```

Table altered.

**The description of above altered table:**

**SQL> desc Gaurav;**

| Name    | Null? | Type                |
|---------|-------|---------------------|
| ROLLNO  |       | NOT NULL NUMBER(38) |
| NAME    |       | CHAR(20)            |
| BRANCH  |       | CHAR(10)            |
| SEM     |       | NUMBER(38)          |
| MARKS   |       | NUMBER(38)          |
| FAV_SUB |       | CHAR(20)            |
| STDID   |       | NUMBER(38)          |

**4.**

## **ADD A RECORD TO DATABASE:**

### **(1) Simple insertion:**

```
SQL> insert into Gaurav  
2 values(8031,'Gaurav','CSE',4,760,'OOPS',1);
```

1 row created.

### **(2) Accepting values from users:**

```
SQL> insert into Gaurav  
2 values(&rollno,&name,&branch,&sem,&marks,&fav_sub,&stdid);  
Enter value for rollno: 6302  
Enter value for name: 'Sourabh'  
Enter value for branch: 'IT'  
Enter value for sem: 4  
Enter value for marks: 833  
Enter value for fav_sub: 'PL'  
Enter value for stdid: 1  
old  2: values(&rollno,&name,&branch,&sem,&marks,&fav_sub,&stdid)  
new  2: values(6302,'Sourabh','IT',4,833,'PL',1)
```

1 row created.

```
SQL> /  
Enter value for rollno: 6058  
Enter value for name: 'Sudhir'  
Enter value for branch: 'CSE'  
Enter value for sem: 4  
Enter value for marks: 730  
Enter value for fav_sub: 'DBMS'  
Enter value for stdid: 2  
old  2: values(&rollno,&name,&branch,&sem,&marks,&fav_sub,&stdid)  
new  2: values(6058,'Sudhir','CSE',4,730,'DBMS',2)
```

1 row created.

**(3) Inserting values into specific columns:**

**SQL> insert into Gaurav**

**2 (rollno,name,branch,sem)**

**3 values(7006,'Amit','cse',2);**

**1 row created.**

The above inserted table is shown below:

**SQL> select \*from Gaurav;**

| ROLLNO | NAME    | BRANCH | SEM | MARKS | FAV_SUB | STDID |
|--------|---------|--------|-----|-------|---------|-------|
| 6070   | Vikas   | CSE    | 4   | 760   | OOPS    | 1     |
| 6302   | Sourabh | IT     | 4   | 833   | PL      | 1     |
| 6058   | Sudhir  | CSE    | 4   | 730   | DBMS    | 2     |
| 7006   | Amit    | cse    | 2   |       |         |       |

7.  
**UPDATING TABLES(MODIFY):**

(a) Updating without where clause:  
SQL> update Gaurav

**2 set name='Goru';**

**4 rows updated.**

**SQL> select \*from Gaurav;**

| ROLLNO | NAME | BRANCH | SEM | MARKS | FAV_SUB | STDID |
|--------|------|--------|-----|-------|---------|-------|
| 6070   | Goru | CSE    | 4   | 760   | OOPS    | 1     |
| 6302   | Goru | IT     | 4   | 833   | PL      | 1     |
| 6058   | Goru | CSE    | 4   | 730   | DBMS    | 2     |
| 7006   | Goru | cse    | 2   |       |         |       |

**(b) Updating with where clause:**

**SQL> update Gaurav**

**2 set name='dada' where rollno=6302;**

**1 row updated.**

**SQL> select \*from Vikas\_kapoor;**

| ROLLNO | NAME   | BRANCH | SEM | MARKS | FAV_SUB | STDID |
|--------|--------|--------|-----|-------|---------|-------|
| 6070   | Goru   | CSE    | 4   | 760   | OOPS    | 1     |
| 6302   | dada   | IT     | 4   | 833   | PL      | 1     |
| 6058   | Gaurav | CSE    | 4   | 730   | DBMS    | 2     |
| 7006   | Gaurav | CSE    | 2   |       |         |       |

## 14. Generating sub query:

**SQL> update Gaurav**

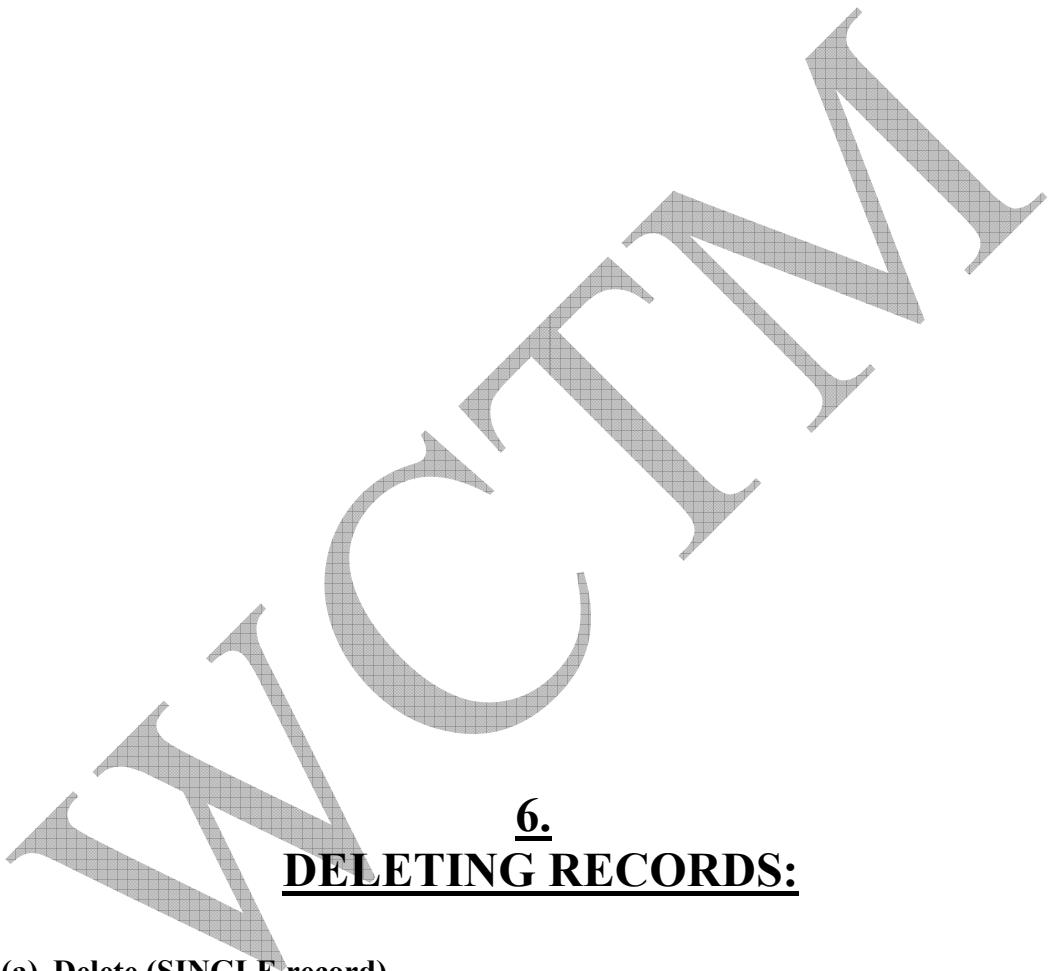

**2 set name=(select name from Gaurav where rollno=6302)**

**3 where rollno=6058;**

1 row updated.

SQL> select \*from Gaurav;

| ROLLNO | NAME    | BRANCH | SEM | MARKS | FAV_SUB | STDID |
|--------|---------|--------|-----|-------|---------|-------|
| 6070   | Goru    | CSE    | 4   | 760   | OOPS    | 1     |
| 6302   | Sourabh | IT     | 4   | 833   | PL      | 1     |
| 6058   | Sourabh | CSE    | 4   | 730   | DBMS    | 2     |
| 7006   | Amit    | cse    | 2   |       |         |       |

## 6. **DELETING RECORDS:**

(a) Delete (SINGLE record)

```
SQL> delete from Gaurav  
2 where rollno=7006;
```

1 row deleted.

```
SQL> select *from Vikas_kapoor;
```

| ROLLNO | NAME  | BRANCH | SEM   | MARKS | FAV_SUB | STDID |
|--------|-------|--------|-------|-------|---------|-------|
| -----  | ----- | -----  | ----- | ----- | -----   | ----- |

|             |                |            |          |                 |          |
|-------------|----------------|------------|----------|-----------------|----------|
| <b>6070</b> | <b>Goru</b>    | <b>CSE</b> | <b>4</b> | <b>760 OOPS</b> | <b>1</b> |
| <b>6302</b> | <b>Sourabh</b> | <b>IT</b>  | <b>4</b> | <b>833 PL</b>   | <b>1</b> |
| <b>6058</b> | <b>Sourabh</b> | <b>CSE</b> | <b>4</b> | <b>730 DBMS</b> | <b>2</b> |

**(b) Delete (MULTIPLE record)**

**SQL> delete from Gaurav**

**2 where branch='CSE';**

**2 rows deleted.**

**SQL> select \*from Gaurav;**

| <b>ROLLNO</b> | <b>NAME</b>    | <b>BRANCH</b> | <b>SEM</b> | <b>MARKS</b> | <b>FAV_SUB</b> | <b>STDID</b> |
|---------------|----------------|---------------|------------|--------------|----------------|--------------|
| <b>6302</b>   | <b>Sourabh</b> | <b>IT</b>     | <b>4</b>   | <b>833</b>   | <b>PL</b>      | <b>1</b>     |

**(c) Delete (ALL records)**

**→ USING TRUNCATE**

**SQL> truncate table Gaurav;**

**Table truncated.**

**SQL> select \*from Gaurav;**

**no rows selected**

**(d) Delete (ALL records)**

**→ USING DELETE**

**SQL> delete from Gaurav;**

**1 rows deleted.**

**SQL> select \*from Gaurav;**

**no rows selected**

**(e) Deleting using sub query**

**SQL> delete from Gaurav**

**2 where rollno=(select rollno from Gaurav where name='Sudhir');**

**1 row deleted.**

**SQL> select \*from Gaurav;**

| ROLLNO | NAME    | BRANCH | SEM | MARKS | FAV_SUB | STDID |
|--------|---------|--------|-----|-------|---------|-------|
| 6070   | Goru    | CSE    | 4   | 760   | OOPS    | 1     |
| 6302   | Sourabh | IT     | 4   | 833   | PL      | 1     |

### **DROPPING TABLE:**

**(a) Dropping a table that has a primary key:**

**SQL> drop table s;**

**Table dropped.**

**(b) Dropping a table that has a foreign key:**

**SQL> drop table sp;**

**Table dropped.**

### **RETRIEVING DATA :**

**(a) Retrieving all records:**

**SQL> select \*from Gaurav;**

| ROLLNO | NAME    | BRANCH | SEM | MARKS | FAV_SUB | STDID |
|--------|---------|--------|-----|-------|---------|-------|
| 6070   | Goru    | CSE    | 4   | 760   | OOPS    | 1     |
| 6302   | Sourabh | IT     | 4   | 833   | PL      | 1     |
| 7006   | Amit    | CSE    | 2   | 729   | FCP     | 1     |
| 6058   | Sudhir  | CSE    | 4   | 729   | DBMS    | 2     |
| 6047   | Richa   | CSE    | 4   | 782   | CAO     | 2     |

**(b) Retrieving specific columns:**

```
SQL> select rollno,branch,name from Gaurav;
```

| ROLLNO | BRANCH | NAME    |
|--------|--------|---------|
| 6070   | CSE    | Goru    |
| 6302   | IT     | Sourabh |
| 7006   | CSE    | Amit    |
| 6058   | CSE    | Sudhir  |
| 6047   | CSE    | Richa   |

**(c) Printing with user defined headings:**

```
SQL> select rollno as rno, branch as stream, name as stdname from Vikas_kapoor;
```

| RNO  | STREAM | STDNAME |
|------|--------|---------|
| 6070 | CSE    | Goru    |
| 6302 | IT     | Sourabh |
| 7006 | CSE    | Amit    |
| 6058 | CSE    | Sudhir  |
| 6047 | CSE    | Richa   |

**(b) Using Logical operators(AND, OR, NOT):**

```
SQL> select * from Gaurav  
2 where(branch='CSE' AND marks=729);
```

| ROLLNO | NAME   | BRANCH | SEM | MARKS | FAV_SUB | STDID |
|--------|--------|--------|-----|-------|---------|-------|
| 7006   | Amit   | CSE    | 2   | 729   | FCP     | 1     |
| 6058   | Sudhir | CSE    | 4   | 729   | DBMS    | 2     |

**SQL> select \* from Gaurav  
2 where(branch='cse' OR marks>750);**

| ROLLNO | NAME    | BRANCH | SEM | MARKS | FAV_SUB | STDID |
|--------|---------|--------|-----|-------|---------|-------|
| 6070   | Goru    | CSE    | 4   | 760   | OOPS    | 1     |
| 6302   | Sourabh | IT     | 4   | 833   | PL      | 1     |
| 6047   | Richa   | CSE    | 4   | 782   | CAO     | 2     |

**(c) Using BETWEEN AND:**

**SQL> select \* from Gaurav  
2 where marks between 730 and 800;**

| ROLLNO | NAME  | BRANCH | SEM | MARKS | FAV_SUB | STDID |
|--------|-------|--------|-----|-------|---------|-------|
| 6070   | Goru  | CSE    | 4   | 760   | OOPS    | 1     |
| 6047   | Richa | CSE    | 4   | 782   | CAO     | 2     |

**(d) Using IN Function:**

**SQL> select \* from Gaurav  
2 where marks in(729,760,782);**

| ROLLNO | NAME   | BRANCH | SEM | MARKS | FAV_SUB | STDID |
|--------|--------|--------|-----|-------|---------|-------|
| 6070   | Goru   | CSE    | 4   | 760   | OOPS    | 1     |
| 7006   | Amit   | CSE    | 2   | 729   | FCP     | 1     |
| 6058   | Sudhir | CSE    | 4   | 729   | DBMS    | 2     |
| 6047   | Richa  | CSE    | 4   | 782   | CAO     | 2     |

**(e) Using LIKE Operator:**

**1). percent:**

**SQL> select \* from Gaurav  
2 where name like '%h%';**

| ROLLNO | NAME    | BRANCH | SEM | MARKS | FAV_SUB | STDID |
|--------|---------|--------|-----|-------|---------|-------|
| 6302   | Sourabh | IT     | 4   | 833   | PL      | 1     |
| 6058   | Sudhir  | CSE    | 4   | 729   | DBMS    | 2     |

6047 Richa

CSE

4 782

CAO

2

2). underscore:

SQL> select \* from Gaurav  
2 where marks like '8\_\_';

| ROLLNO | NAME    | BRANCH | SEM | MARKS | FAV_SUB | STDID |
|--------|---------|--------|-----|-------|---------|-------|
| 6302   | Sourabh | IT     | 4   | 833   | PL      | 1     |

3). IS NULL:

SQL> select \* from Gaurav  
2 where stdid is null;

| ROLLNO | NAME | BRANCH | SEM | MARKS | FAV_SUB | STDID |
|--------|------|--------|-----|-------|---------|-------|
| 7006   | Amit | CSE    | 2   | 729   | FCP     |       |

**9.**  
ORDERING RECORDS:

a). ascending:

```
SQL> select * from Gaurav  
2 order by name asc;
```

| ROLLNO | NAME    | BRANCH | SEM | MARKS | FAV_SUB | STDID |
|--------|---------|--------|-----|-------|---------|-------|
| 7006   | Amit    | CSE    | 2   | 729   | FCP     | 1     |
| 6047   | Richa   | CSE    | 4   | 782   | CAO     | 2     |
| 6302   | Sourabh | IT     | 4   | 833   | PL      | 1     |

# WCTM /IT/LAB MANUAL/4TH SEM/DBMS LAB

## 11. ORACLE FUNCTION:

a). **add\_months:**

SQL> select sysdate, add\_months('9-april-2005',4) from dual;

SYSDATE ADD\_MONTH

-----  
08-APR-05 09-AUG-05

b). **last\_day:**

SQL> select sysdate,last\_day('9-april-2005') from dual;

SYSDATE LAST\_DAY

-----  
08-APR-05 30-APR-05

c). months\_between:

SQL> select sysdate, months\_between(sysdate,'02-nov-1985')from dual;

**SYSDATE MONTHS\_BETWEEN(SYSDATE,'02-NOV-1985')**

---

**08-APR-05                    233.22555**

d). next\_day:

SQL> select sysdate,next\_day('9-april-2005','monday')from dual;

**SYSDATE NEXT\_DAY(**

---

**08-APR-05 11-APR-05**

Ceil:

SQL> select ceil(months\_between(sysdate,'02-nov-1985'))from dual;

**CEIL(MONTHS\_BETWEEN(SYSDATE,'02-NOV-1985'))**

---

**234**

Floor:

SQL> select floor(months\_between(sysdate,'02-nov-1985'))from dual;

**FLOOR(MONTHS\_BETWEEN(SYSDATE,'02-NOV-1985'))**

---

**233**

**Mod:**

SQL> select mod(10,7) from dual;

**MOD(10,7)**

-----

3

**Power:**

SQL> select power(2,3) from dual;

**POWER(2,3)**

-----

8

**Sqrt:**

SQL> select sqrt(10) from dual;

**SQRT(10)**

-----

3.1622777

**Abs:**

SQL> select abs(10)from dual;

**ABS(10)**

-----

10

## **AGGREGATE FUNCTIONS:**

◆ **AVG()**

SQL> select avg(marks) from Gaurav;

**AVG(MARKS)**

-----

766.6

◆ **MAX()**

SQL> select max(marks) from Gaurav;

**MAX(MARKS)**

-----  
**833**

◆ **MIN()**

**SQL> select min(marks) from Gaurav;**

**MIN(MARKS)**

-----  
**729**

◆ **SUM()**

**SQL> select sum(marks) from Gaurav;**

**SUM(MARKS)**

-----  
**3833**

◆ **COUNT()**

**SQL> select count(name) from Gaurav;**

**COUNT(NAME)**

-----  
**5**

**SQL> select count(\*) from Gaurav;**

**COUNT(\*)**

-----  
**5**

10.

## GROUPING FUNCION

### GROUP BY clause:

```
SQL> select sum(marks) from Gaurav  
  2 group by stdid;
```

SUM(MARKS)

```
-----  
2322  
1511
```

### HAVING clause:

```
SQL> select sum(marks) from Gaurav  
  2 group by stdid  
  3 having sum(marks)>2000;
```

SUM(MARKS)

```
-----  
2322
```

### ALL clause:

```
SQL> select all name from Gaurav;
```

NAME  
-----

Goru
